A good understanding of comprehension is essential for effective writing and communication. The **Targeting Comprehension** series teaches students how to read between the lines. Each book contains activities for Literal and Inferential comprehension. Literal comprehension is simply what the text says whereas Inferential comprehension interprets ideas, intent or information in explicit text to make assumptions. The activities in this series are intended to teach students how to hypothesise and conclude using their personal experience and intuition. In other words—how to read between the lines.

Each of the following elements of comprehension are explained in separate sections and use three sample text types. These are; **informative**, **imaginative** and **persuasive**.

Literal—understanding information and facts directly stated in the text

Inferring—making assumptions based on context

Predicting—extrapolating where aspects of a text may lead

Analysing—interpreting the unstated notions behind what is written

Making connections—finding links between two elements of a text

Critical reflection—drawing on own experience and knowledge to gain insight into characters

Also included is an assessment section for each of the six comprehension elements and removable answers.
